# Natural and organic pest control options - Wondercide

WONDERCIDE COMPANY | JULY 25, 2012 | BY: DEBRA ELDREDGE |

Cedar trees provide the oil that is the basis of many Wondercide products.

[Wondercide \(http://www.wondercide.com/\)](http://www.wondercide.com/) is a company dedicated to providing natural and organic pest control options for your pets and your property. The company was started in 2008 by Stephanie Boone in response to her dog Luna's reaction to pesticides. This is a [Green Certified Business \(http://www.gbcertified.com/11-Certified-Business\)](http://www.gbcertified.com/11-Certified-Business)

[Home.asp](#)) and even better, can proudly also state all products are "made in the USA".

[Evolv \(http://www.wondercide.com/flea-spray.html\)](http://www.wondercide.com/flea-spray.html) is the company's signature flea and tick spray for use on dogs and cats. The active ingredients are [organic cedar oil \(http://www.wondercide.com/content/cedar-oil/\)](http://www.wondercide.com/content/cedar-oil/) and [hydrated silica \(http://www.wondercide.com/content/hydrated-silica/\)](http://www.wondercide.com/content/hydrated-silica/). Cedar is considered to be a renewable resource - in fact, in some areas, it is considered to be a "nuisance" tree. Cedar oil itself is in the FDA (Food and Drug Administration) category of [GRAS \(http://www.fda.gov/Food/FoodIngredientsPackaging/GenerallyRecognizedasSafeGRAS/GRASListings/default.htm\)](http://www.fda.gov/Food/FoodIngredientsPackaging/GenerallyRecognizedasSafeGRAS/GRASListings/default.htm) or Generally Regarded As Safe.

The Wondercide Company also provides products for treating your house and your property outdoors if you have a serious pest problem, such as flea infestation. They do offer complete treatment packages, including

one for bed bugs, which might be quite popular!

There may be individual pets who react even to benign compounds such as the cedar oil, so you should apply this with caution the first time. If your pet reacts with itching or irritation, simply wash the spray off immediately using a gentle detergent.
