Why It Works

The active ingredient in Wondercide Flea & Tick products is cedar oil, which has been used for centuries to protect from pests (think Grandma's cedar chest!). Cedar oil works by blocking octopamine, which is necessary to regulate heart rate, movement, and metabolism in "bad bugs" like fleas and ticks. When cedar oil is present in the area, pests are repelled. When contacted by cedar oil, pests die.

How to Use It

To eliminate an **active** flea or tick problem, spray pets and indoor areas with Pets + Home. For best results, use Yard + Garden in any outdoor areas to eliminate fleas at the source. For **prevention**, use Pets + Home every 2-3 days, or when in untreated areas that may contain fleas. Treat outdoor areas every 30-45 days and high-activity areas indoors quarterly.
